

Yarwood Leather Travel Policy Statement – April 2020

Yarwood Leather is fully aware that transport is an important source of emissions to air, noise and disturbance to local communities. As such we aim to reduce our emissions from our own vehicles, employees, suppliers and visitors to the our site:

- We will provide public transport information to those who visit our site, providing them with information on how to reach us by public transport if they so choose. We are just off Bus Route 229 from Leeds and 40 minutes from Morley station.
- We have good pavement access to our premises, meaning that it is possible to walk to our premises for employees and visitors who are local to us.
- Bicycle loans are available for employees who wish to cycle to work.
- We support our employees to think about car sharing.
- 50% of our sales vehicle fleet are hybrid vehicles.
- Where possible, our sales team will aim to geographically group visits together to reduce road mileage.
- Within our site, we only use electrically powered fork lift trucks to move materials.
- We encourage our suppliers to use low emission vehicles.
